Light Frame System

Product Overview

The Artline Light Frame System is an ultra-slim sheet of light that combines LED lighting technology and an exclusive 3D cutting process to give you a versatile light source that generates a soft & even beam of light virtually without any heat. It's slim profile and low power draw make the Artline Light Frame System applicable in many different applications; especially retail & display lighting, accent and signage lighting.

Early AM / Late PM
Domestic Lighting

Super Slim:

- The thickness of the **Artline** Light Frame System is only 1/4", and the embedded acrylic is only 3/16" thick.

Dimmability:

- The sytem is dimmable to >10% when matched with Dimmable Power Supplies.

Long Lifetime & Virtually Maintenance Free

- Our proprietary blend of LEDs are sourced to perform for a minimum of 50,000 hours. That equates to nearly 12 years running 12 hours per day.

Eco-Friendly Product:

- This is the optimum lighting technology of the 21st Century as it contains NO mercury nor any other heavy materials.

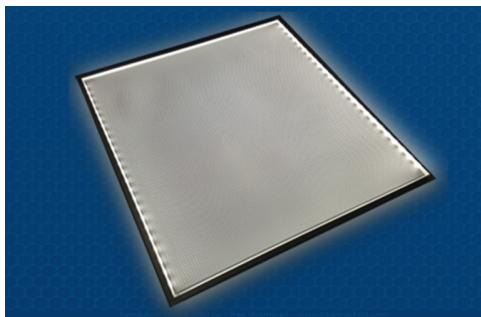

Hospital & MRI Safe:

- The sytem contains no ferrous/magnetic materials, making it safe for MRI Suites with a Remote Power Supply (RPS) up to 30 feet from the application.

Approvals and Certifications:

- The sytem is UL Approved and all power supplies are UL listed.
